

Easy Bonus Creation

How To Use ChatGPT To Create Awesome Bonuses
For Your Affiliate Marketing Business!

Welcome

Many thanks for downloading this report.

Inside you'll learn how to create awesome bonuses that you can use to generate more affiliate marketing commissions.

By using the power of ChatGPT, these bonuses are super easy to create in minutes, yet can massively increase how much you earn for each promotion you do.

Bonuses are so powerful to get people to buy through your link and not someone else's.

So it's crucial you have awesome ones that you can offer to your list.

Let's get started...

Finding Products To Promote

We assume that you already have products to promote as an affiliate.

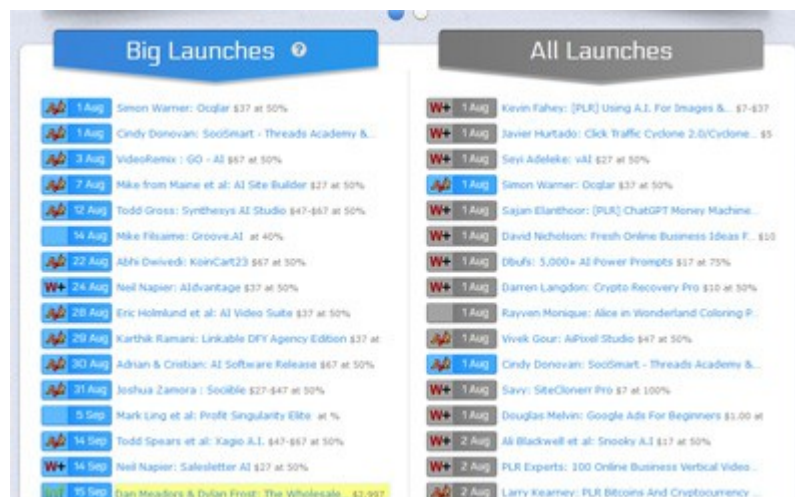

But just in case you don't, we wanted to include this section to give you some ideas on how to find hot products to market.

Product Launches

Product launches are great to use, so that you always have something new to promote.

And they're easy to find to.

Just head over to [MunchEye.com](https://muncheye.com) and you'll find a list of dozens and dozens of products that are launching soon.

You can find ones you think your list will like and apply to get your affiliate link.

The site is updated daily and is really simple to find suitable products you can promote.

Evergreen Products

If you don't want to do product launches, then there are thousands of evergreen products and services you can promote too.

All you need to do is head over to one of the popular affiliate networks such as WarriorPlus, JVZoo, ClickBank, ShareASale, Impact, CJ or use Google to find self-hosted affiliate programs in your niche.

You'll just have to apply to get your link for each program.

Creating Your Bonuses

Now that you have your product(s), it's time to create an awesome bonus!

The easiest bonus to create is a digital report.

The key is to make it highly related to the product you're promoting. It needs to enhance, improve or speed up the results that people who buy the product can use.

Some examples can be:

- Cheat sheets
- Resource lists
- Quick-start guides

And each can be created using ChatGPT in minutes.

Let's pick an example product...

Ok, so I've been to the MunchEye.com website and looked at launches coming up in the next 7 days.

I've found this one which is about self-publishing:

Let's think about what type of bonus would people need if they bought a product about publishing their own books.

Well, how about a list of 50 hot titles for their first book?

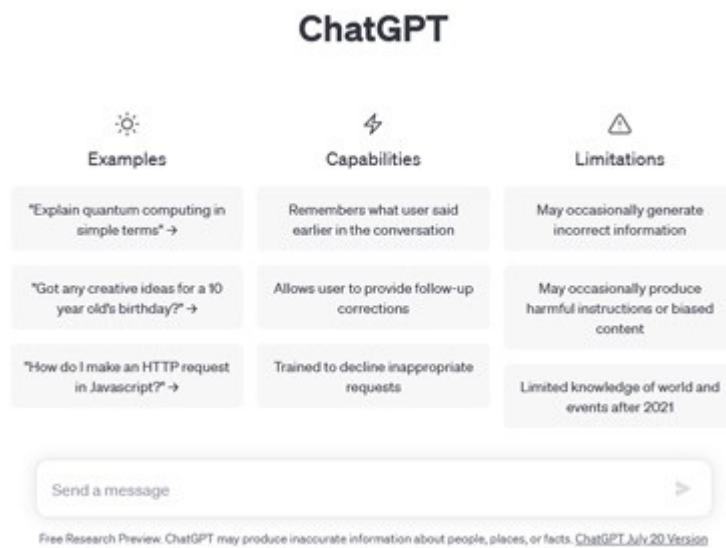

That will save them time, research and means they can get started faster.

Perfect!

Let's head over to ChatGPT and create our bonus.

If you don't already have a free account at [OpenAI](#), you'll need to create one. It only takes a few seconds to sign up.

Once signed in, you'll see this screen:

At the bottom, where it says "Send a message" is where we are going to ask it to generate the information for our bonus.

So we type in to that box:

Give me 50 non-fiction book title ideas for a popular Amazon book

And ChatGPT goes to work and provides us with the list:

Sure, here are 50 non-fiction book title ideas for a popular Amazon book:

1. "The Power of Habit: Transforming Your Life One Routine at a Time"
2. "Thinking Fast and Slow: Unleashing the Potential of Your Mind"
3. "The Art of Productivity: Mastering Time Management and Achieving Your Goals"
4. "Influencer Marketing Secrets: How to Grow Your Business with Social Media Influencers"
5. "The Science of Happiness: Discovering Joy and Fulfillment in Everyday Life"
6. "Financial Freedom Blueprint: Building Wealth and Achieving Financial Independence"
7. "The Art of Negotiation: Mastering the Skills to Win in Business and

Great, we now have 50 book title ideas to add to our bonus.

Putting the Bonus Together

We now need to get the information ChatGPT has provided and add it to a suitable means for download.

Use your choice of text editor, whether it's Microsoft Word, Open Office or even a Google Document.

Copy the list of 50 titles from ChatGPT and paste them into your text document.

Feel free to add a title and any extra paragraphs or images you wish (*optional*).

Then export the document as a .pdf document.

That's it, your brand new bonus is now ready to be given away.

An Evergreen Example

Let's now look at creating a bonus for an evergreen product.

Aweber – One of the most popular email management software products on the market.

What type of bonus would suit someone wanting to make money with email marketing?

Well, how about 20 proven ways to make more money from your email list?

Perfect!

Let's head over to ChatGPT and enter the prompt:

Give me 20 ways to make money from my email list.

And it brings back:

Having an email list can be a valuable asset for making money online.
Here are 20 ways you can leverage your email list to generate income:

1. Affiliate marketing: Promote products or services through affiliate links and earn a commission for every sale or lead generated through your referrals.
2. Product launches: Create and sell your own digital products, courses, or e-books to your email subscribers.
3. Sponsored emails: Offer to send promotional emails on behalf of other businesses in your niche and charge a fee for the service.
4. Webinars and workshops: Host exclusive webinars or workshops for your subscribers and charge a fee for attendance.
5. Premium content subscriptions: Offer premium content or a paid

So all we need to do now is copy the list, create our .pdf report and we have an instant bonus to use.

You can do this with pretty much any product or service you can think of.

Just think of a great addition to the product/service, create your bonus guide and start making those commissions!

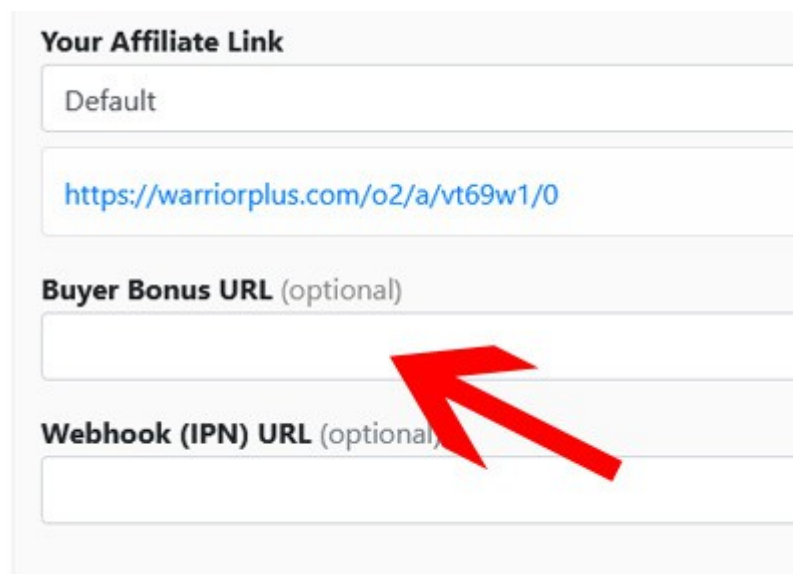

Delivering Your Bonuses

This will depend on the network/partner you are using.

You can do it the manual way and ask people who buy the product through your link to forward you their purchase receipt. Then you can send them the .pdf bonus via email.

Or, platforms such as WarriorPlus and JVZoo allow you to add your bonus to a product and it will be automatically delivered to each buyer.

You'll just need to upload your bonus to your web host, or file sharing provider, so that you have a URL/Link people can visit to download the .pdf:

The image shows a form titled "Your Affiliate Link" with several input fields. The first field is labeled "Default" and contains the URL "https://warriorplus.com/o2/a/vt69w1/0". Below this is a field labeled "Buyer Bonus URL (optional)" which is currently empty. A large red arrow points to this field. Below that is a field labeled "Webhook (IPN) URL (optional)" which is also empty. The form has a light gray background and white input boxes.

Your Affiliate Link
Default
https://warriorplus.com/o2/a/vt69w1/0
Buyer Bonus URL (optional)
Webhook (IPN) URL (optional)

Summary

So that's just how easy it is to create an unlimited amount of bonuses you can use in your affiliate marketing business.

You're only limited by your own imagination.

All you need to do is find great products to promote and then think of what information would make an awesome bonus for those products.

Take a couple of minutes to compile your bonus using ChatGPT and roll out the promotion to your list.

Then wait for those extra commissions to come rolling in!

We hope this report helps you to make a lot more money for your online business.
